"One specimen can give you a huge amount of information."

Sankurie Pye
NMS Curator

Ocean Quahog
Clam

"One of these shells is like a library for up to 300 years"

Fiona Ware
Curator Marine invertebrates
N.M.S.

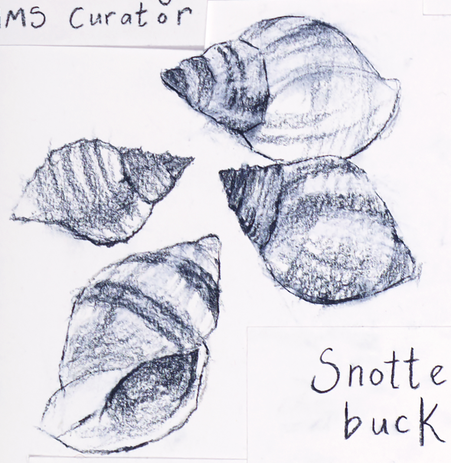

Razor clam - Spoot

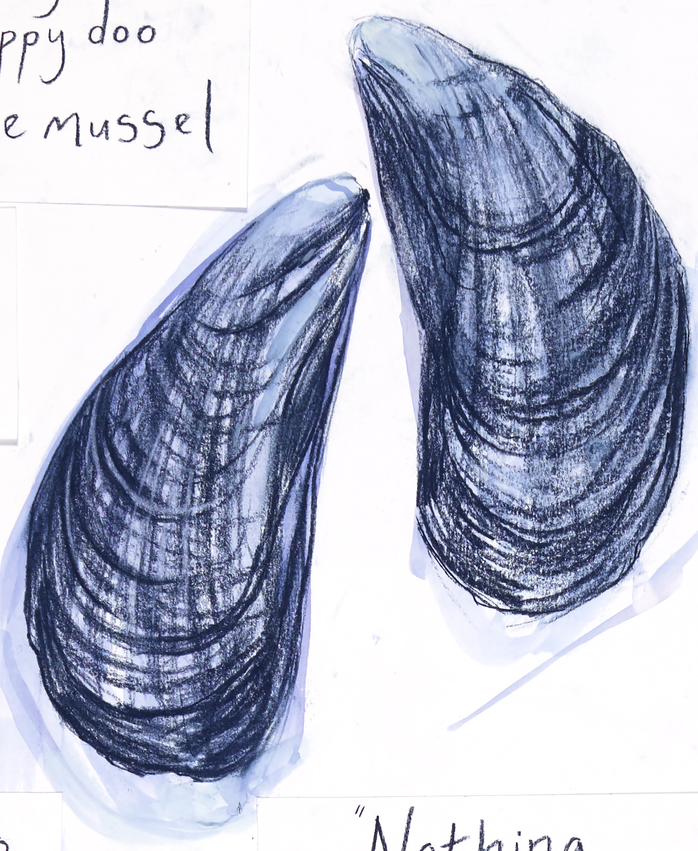

Langoustine

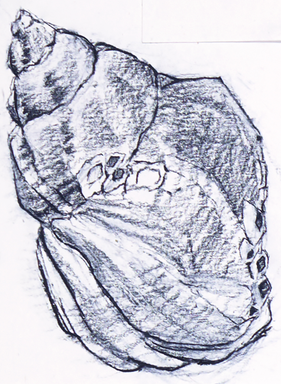

Green Shore Crabs
go to Spain to be made into Stock cubes
"Nobody here would eat them too polluted"

Clabby dubh
Clappy doo
Horse mussel

Snottery
buckies
Common
Whelk

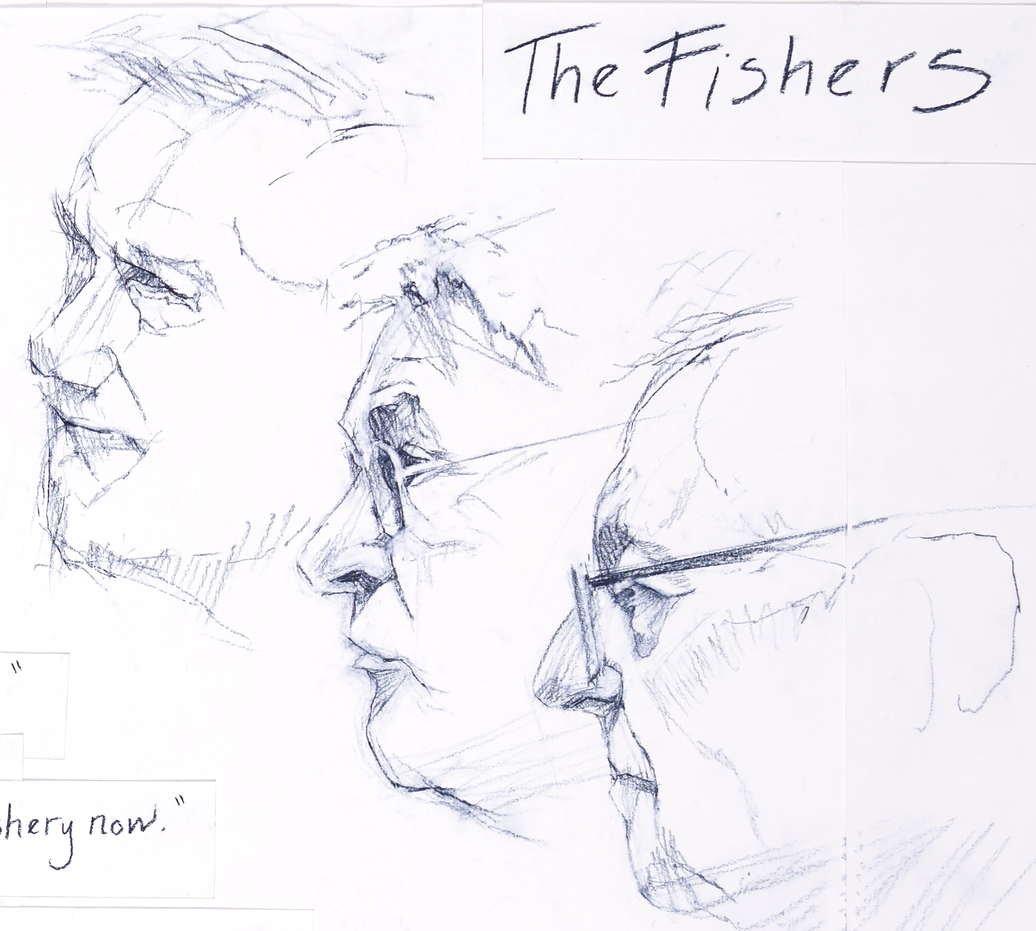

"You don't need to protect the species
Protect the environment"

Georg Hantke N.M.S
curator of vertebrates

"Nothing stays the Same"

The Fishers

"The fish is definitely in decline."

"There is no herring fishery now."

"The 3 mile limit should never have been removed"

Bill Hall
Stephen James Todd
Bill Simpson

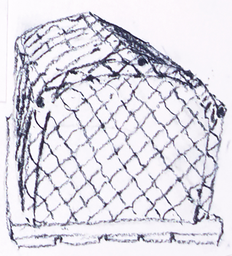

"Removing the three mile limit has resulted in a very lucrative nephrop/langoustine fishery for Pittenweem, Port Seton, Dunbar and Eyemouth"

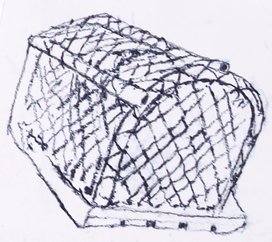

"we could have told you that if you had asked."

"Use local knowledge, don't extract it then run away."

"You can have Sustainable fishing"

Creels

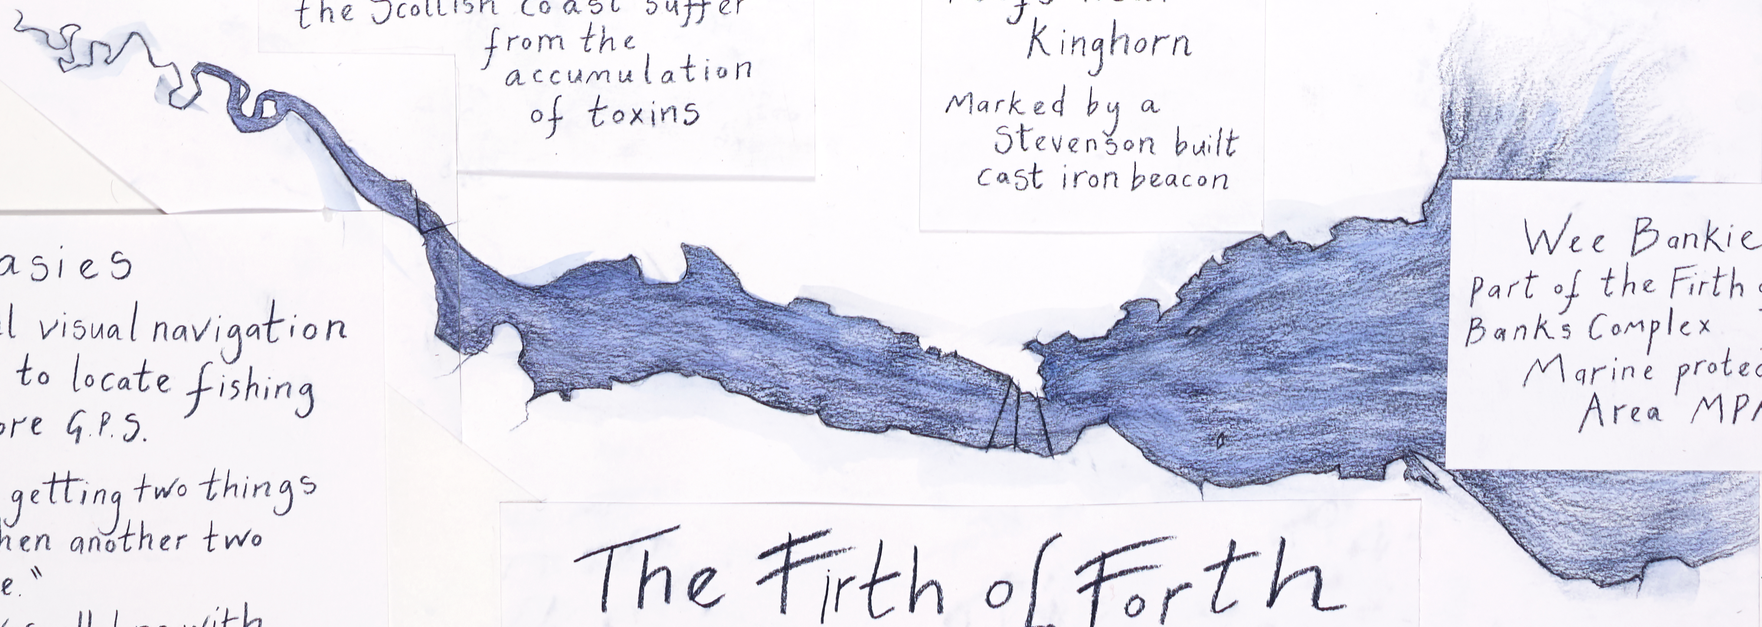

Lulu the Scottish killer Whale
Died in 2016, she had one of the highest concentrations of toxic pollutants ever recorded in a marine animal
She was infertile

All resident Orca's around the Scottish coast suffer from the accumulation of toxins

The Vows
reefs near
Kinghorn
Marked by a Stevenson built cast iron beacon

Pauchle ~
a perk ~ pilfered stock

"They are dead they just don't Know it"

Measies
a traditional visual navigation method used to locate fishing grounds before G.P.S.
"Measies are getting two things in line and then another two things in line."
"It was all done with landmarks"

Wee Bankie
Part of the Firth of Forth Banks Complex
Marine protected Area MPA

Created by Helen Kennedy for Edinburgh Shorelines Shifting baselines projet
Funded and supported by FORTH 20

The Firth of Forth

"You never see the laddies down the pier anymore."
